Trees

Trees come in many different shapes and sizes. Trees can 10
be small or large. Some trees can grow as tall as a thirty- 23
nine-story building. Others may be shorter than a one-story 31
building. 32

Pine trees grow in areas where the weather is cool. They are 44
shaped like cones. Pine trees often are found in mountains. 54

Palm trees grow in areas where the weather is warm. They 65
look like poles with a bunch of leaves at the top and often 78
are found on beaches. 82

Some trees have wide leaves while other trees have narrow 92
leaves. Oak trees have bumpy leaves, and elm trees have 102
pointy leaves. Trees can be as different as people. 111
